# AVAILABLE TREES

White Oak 2-3 gall.  
(*Quercus alba*)

This beautiful tree can be found presiding over pastures, providing shade in urban parks and suburban neighborhoods, and thriving in natural stands throughout the eastern United States and southeastern Canada. The tree displays a splendid red fall color and features a broad canopy. Suitable for large areas.

Sugar Maple 2-3 gall.  
(*Acer saccharum*)

The sugar maple is one of America's best-loved trees. While commercially planted for its delicious syrup and value as lumber, this tree makes a great addition to any yard or park.

And one of its most prominent features is amazing fall color. As the seasons change, the leaves turn vibrant shades of yellow, burnt orange, and red.

# AVAILABLE TREES

Sweet Bay Magnolia 2-3 gall.

*(Magnolia virginiana)*

While it may not produce as many blooms as other magnolias, the sweetbay magnolia should not be counted out of your landscape plans. This tree flowers late in the spring, avoiding much of the frost that can spoil a blooming tree's beauty. It also attracts a wide variety of songbirds with its fall fruit. The tree produces creamy white flowers with light lemon scent and yields scarlet-red seeds, attracting many birds.
