## How to Share Readers with Another Caregiver

You may want to share a particular reader's information with another caregiver so each caregiver has the chance to update the reader's information and keep track of reading and activities without accessing the other's account information. You may do this through use of a Share Code.

First, log in to your account at <u>https://springfieldmontco.beanstack.org</u>. Use the drop-down menu on the top left to navigate to the reader whose information you wish to share. Click the reader's name from the list (if the name is not displayed, select "Change Readers" and choose the appropriate name from the resulting page).

Add a Reader		

Once on the correct reader's page, select the "Edit Reader" link next to the reader's name in the top left.

			Current Challenges				

On the resulting page, scroll down to the Share This Reader section.

Enter the email of the person you wish to share the reader with and click the blue "Send" button. The person with whom the reader was shared will receive a message that the account creator wants to share this reader. They will be prompted to add their own Beanstack account (if they do not have one), or enter a code to add this reader to an existing account.

If you receive a share code invitation and have an existing Beanstack account, log into your account and click on the gear symbol in the top right.
